

## Wood Aluminum Elegance 84

Elegance 84, wood and aluminium windows, combines design and technology: structural gluing of the glass to the wing and the external aluminium profile with classic lines make it ideal for any architectural style.

The use of double-chamber glass allows it to achieve excellent performances, making Elegance 84 suitable for installation also in Passive House

### Dimensions (in mm)

Wing Section	<b>84X81</b>
Frame Section	<b>84X80</b>
Glass space	<b>32-42</b>

### Gaskets

Thermal ascostic seal	<b>2</b>
-----------------------	----------

### Hardware

Anuba hinges  
Maico hinges  
Burglar- proof hardware

### Typologies available

Squared  
Arched  
Inclined

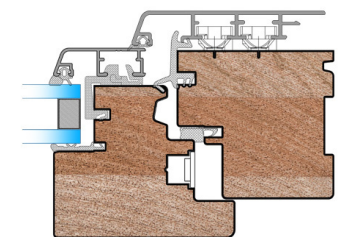

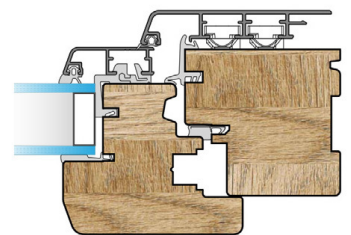

Fixed  
Swing opening  
Tilt&Turn  
Lift & Slide door  
Coplanar Sliding door  
Pivot  
Entrance door

### Performances

Air permeability  
Watertightness  
Resistance to wind load  
Thermal insulation

### External Aluminum

Junction  
Covering of the frame
